South Building, Room 101
(just north of Indian School)

Digital Photography II

The Digital Photography certificates offer professional training in creating, editing and manipulating digital photographs. Digital photography may be used in web design, multimedia, filmmaking, as a fine art medium or in commercial photography.

This program is designed to prepare students for an internship, entry-level employment or business.

Students are responsible for purchasing their own cameras and supplies.

Note: A digital camera is required for the Digital Photography certificates. Although any type of digital camera may be used for the beginning classes, optimal camera features for the more advanced classes include aperture priority, shutter priority, manual exposure and RAW format option. Suggested brands include Canon, Nikon and Sony. If you plan to pursue a Level II certificate, please see the camera requirements for Level II.
